S
N **B. Population Problems**

563 1. Traditional Antagonism Between the Moslems and the Chinese

578 669 648 175 Of the many problems in regard to the population of Northwest China, the traditional antagonism between the Moslems and the Chinese, together with its international complications, is by far the most serious. Moslem uprisings have been frequent and often caused great massacres on both sides. In most cases the Moslem disturbances are supported and made use of by ambitious neighboring powers, particularly Russia - both Tsarist and Soviet. In 1871 Tsarist Russia used the 1861-1874 Moslem disturbance as a pretext to occupy the Ili Valley and then force China to cede the lower part of the Valley, sest of Khargos to Russia. Time and again Russia took advantage of Moslem troubles in Sinkiang to make some special territorial, political and economic demands in the provinces, i.e., free trade in Sinkiang by the Ili Commercial Treaty of 1851 and the cession of the territory west of Tarbagatai by the treaty of Chuguchak (Ta-cheng) in 1864.

S
648 Sinkiang had always been a center of international intrigue between Russia and Britain for the spoils of Central Asia, as well as the barometer of power relations between Russia and China. (See Foreign Relations).

S
642 2. The Uighur Autonomy

177 [668] Under the Chinese Communist Regime, Sinkiang became the Uighur Autonomous Area in September, 1955. A National Autonomy for Sinkiang was first recommended by General Chang Chih-chung, a liberal Nationalist Government high official in 1946-49. He was "influenced by views of American politicians who insisted that the principle of self-government should be applied to Sinkiang also - an illusory wish for a people which stood between Russia and China, like a mouse between two cats." (CNA. No. 103, October 7, 1955).

S
167 708 466 A continuous great influx of Chinese to Sinkiang has occurred, which is particularly marked by the present-day Army Construction Corps and the presence of the Corrective Labor Force. The soldiers are sent to meet the urgent demand of labor to undertake the gigantic construction program and the latter, estimated at several hundred thousands, are condemned to forced labor in the thinly populated border areas. (See: Labor).

S
642 668 177 "Since the Chinese Communist troops entered Sinkiang, the rulers have always been Chinese, and at present, with the introduction of autonomy, this Chinese domination is the more emphasized." (CNA. No. 103, October 7, 1955). Furthermore, Government officials are transferred from Peking to Sinkiang in large numbers. On August 21, 1955, seventy-nine officials from the "First Grade Offices" of the Central Government left Peking for Sinkiang; at the same time

LABOR

I. "Free Labor

N
464 Information on labor conditions in the Northwest is very scanty. However, there are indications that the Communists have faced a very serious problem of labor shortage in that N
[162] area. To begin with, the Northwest is a very sparsely populated area. It embraces about one third of China's territory, but its population is only about six percent of the national total. If any large scale reconstruction works are to be effected, N
it seems to be necessary to use outside labor supplies. More- [871] over, educational standards in the Northwest have been relatively N
low. Consequently, the quality of native labor is also a problem.
464 To overcome these difficulties, the Communists have adopted
*668 several methods. One is to encourage or force skilled and
177 semi-skilled labor in other parts of the country to work in the
167 Northwest. For instance, the communication department of
[466] Sinkiang in May, 1955, absorbed some 409 automobile drivers S
and mechanics from among the demobilized servicemen in [464] Shantung and Honan for reconstruction work in the border
[66] regions. In March, 1955, 200 cadres of Hui nationality of the People's Liberation Army Railway Corps have been transfered to work in the Hui-nationality areas in Kansu and Chinghai. Most of these cadres have passed through the Anti-Japanese "War of Liberation," land reform and Anti-U.S. and Aid-Korea campaigns. Of these ninety percent are party members or members of the Communist Youth League.

In late 1954, four thousand skilled building workers and technicians from other cities have signed up for work in Sian. They began to arrive from Shanghai, Wuhan, Canton and other places in early 1955, and they were warmly welcomed by the local authorities. All this shows that outside labor has played a very important part in the economic reconstruction in the Northwest (See also section Population).

II. Army Labor

S
464 Another method is to use the army as a labor force. This
701 has been particularly important in Sinkiang, in which the
•708 People's Liberation Army have participated in many reconstruction
668 projects. To take 1955 as an example, they were engaged in
177 the following tasks:

A March 24, 1955, despatch reports: "The People's Liberation Army farming units in Sinkiang have started their afforestation program in the south of this province. This year they plan to plant trees on 1,200 hectares, mostly shelter belts to protect reclaimed farmland."

464 An April 18, 1955, despatch reports: "The People's Liber-
701 ation Army in Sinkiang has started spring sowing on the plains
708 north and south of the T'ien-shan Mountains. Crops already
668 sown include spring wheat, oil-bearing plants and long
177 staple cotton. The army men are experimenting with the
241 cultivation of long staple cotton in the Turfan Basin, where favorable conditions exist. This year the PLA farming units will cultivate over 66,000 hectares, or thirteen percent more than last year. More than half of the land will be ploughed by tractors. Adequate supplies of chemical fertilizer and insecticides are on hand."

708 A June 3, 1955, despatch reports: "The largest reservoir
653 in Sinkiang is being enlarged this month by engineering units
312 of the People's Liberation Army stationed in Sinkiang. When
668 completed, the Men-chin reservoir, north of Urumchi, will
177 have a storage capacity of sixty million cubic meters of water
503 which can be used for irrigation."
464 An October 31, 1955 despatch reports: "A leading part has been played by the People's Liberation Army in irrigation works in Sinkiang. With their help, the peasants have constructed nine reservoirs, repaired irrigation canals and ditches, totalling 30,000 kilometers in length, built hundreds of new canals and added more subterranean waterways, a form of irrigation traditionally used in the region. In addition, the People's Liberation Army units have built and expanded works capable of irrigating 200,000 hectares, mostly farmed by local peasants. The army men also reclaimed over 73,000 hectares of wasteland and set up twenty-nine mechanized state farms."

708 A November 3, 1955, despatch reports: "Manass Basin
241 Agricultural Production Construction Troops of Sinkiang Military
668 District of the People's Liberation Army plan to grow cotton in
177 an area of 202,000 mou next year, one hundred forty-six percent
464 larger than this year. These troops are now actively undertaking
[248] the preparatory works."

A December 24, 1955, despatch reports: "A new mechanized farm has been built in the Manass Basin by PLA. It has some 10,000 hectares of well irrigated farmland, part of which has already been sown in winter wheat. They plan to supply the state with nine thousand tons of grain and twenty-eight hundred tons of cotton next year."

701 The constitution of the so-called People's Liberation Army
708 in Sinkiang has not been disclosed. But to use the regular army
464 as a labor force in peace time is, to say the least, forced labor
466 in disguise. (See section Forced Labor of General Handbook).

000

III. Conscript Labor

S 668 708 208 545 4. Cultural corps

In the army, cultural work corps promoted propaganda by means of entertainment. In local dances and songs, the Cultural Work Corps of the Fifth Army (originally the Sinkiang National Army) in the summer of 1951 promoted the Party's Nationality policy and the Resist-America Aid-Korea movement in Sinkiang. They visited various villages and regularly attracted an audience of from three or four thousand to ten thousand people. The members included thirteen minority groups living in Sinkiang. Some of them went to Peking in 1953 and presented a performance of 21 acts before the audience in the capital.

S [563] [484] [648]

The visit was returned by the Central Nationality Dancing Corps of Peking which sent a performing team of 140-odd members to Sinkiang in April, 1955 to celebrate the establishment of the Sinkiang Uighur Autonomous Region. It spent more than half a year in Sinkiang and returned to Peking on November 13 after having visited ten special districts, three autonomous chou, seven counties, two state farms, three mines in Sinkiang and two cities (Lanchow and Su-chou) in Kansu. It performed 112 times before audiences of various nationalities totalling more than 439,000 people.

S 668 648 545

N *668 208 IV. The Methods of Propaganda.

Besides those already mentioned, the Communists are using many other methods of propaganda. Parading, signature drives, circulation of pictures and pictorial stories, large-scale welcome meetings for important personnel sent from Peking, lantern slides and movies produced by the Party and the government, theater activities such as opera, drama, dance, and concerts all have been used as means of propaganda. The public accusation meeting is another form. No matter what the main target of a particular accusation meeting may be, whether a landlord or the U.S.A., the accusation always carries out the propaganda of the day, whether it be the Resist-America Aid-Korea movement or land reform. Other kinds of meetings are equally useful. "Model Peasants Rallies," held in the main farming districts of Sinkiang are the place to promote propaganda for increasing production as well as for denouncing germ warfare.

S [668] [208]

N *668 796 [563] [771] [651] A. Festivals

Festivals are always good opportunities for promoting propaganda. In Northwest China where most of the minority groups are followers of the Moslem religion, the Islamic festivals are used as a time to express the thoughtfulness of the Communist government. For instance, during their celebration of the three major Moslem festivals of the year, the butchery tax on beef and mutton consumed by Mohammedan communities is exempted. Further-
